Professional Summary

Backend Engineer with 3+ years of experience building high-throughput distributed systems in **Golang** and **PHP**. Architected WhatsApp-based lead processing systems handling **400K+ messages/day** at IndiaMART. Proven track record of migrating legacy PHP services to Golang, achieving **85% CPU reduction** while maintaining throughput. Strong expertise in Kafka and event-driven architectures.

Experience

IndiaMART Noida, Uttar Pradesh

Senior Engineer *Jan 2026 – Present*

- **Worked** as a full stack engineer across Golang services and React dashboards
- **Built** verified business buyer flow and the paid buyer dashboard
- **Shipped** TrustPulse: seller-buyer RFQ to quotation journey on WhatsApp
- **Built** Smart RFQ form using AI to capture better buyer requirements
- Improved lead quality from **40%** → **80%** over 3 quarters through continuous optimization and iterative A/B testing
- **Designed** and built "VANI" voice agent (Golang + Kafka) processing **80K** inbound/outbound calls/day;

Associate Software Engineer *Jun 2023 – Present*

- **Architected** WhatsApp lead approval system handling **400K** messages/day; drove lead generation +**20%** and engineered multi-vendor integration for modular, plug-and-play architecture

Software Engineer Intern *Feb 2023 – Jun 2023*

- **Led** localization and relevance improvements for buyer-supplier matching algorithm (PHP → Golang migration), increasing match accuracy and user engagement
- Built internal **payment dashboard** for call center agents to track and visualize daily incentive payouts; automated manual reconciliation, eliminating payment errors and serving **50+** agents
- **Migrated** legacy PHP workers to Golang (Kafka), reducing CPU utilization by **85%** while maintaining throughput
- **Implemented** controller-repository design pattern across **15+** services, standardizing code architecture and improving testability

Projects

Colify – Online Education Platform *Jan 2022 – May 2022*

Built full-featured classroom platform (MERN Stack) with live video classes, real-time notes sharing, exam scheduling, and peer chat using WebSocket

Encrypted Cloud Storage System *Jun 2022 – Aug 2022*

Engineered secure file storage (MERN + AES Encryption) using crypto.js; built RESTful APIs for file upload, download, and permission management

Education

Indian Institute of Information Technology, Gwalior — B.Tech Computer Science Engineering 2019 – 2023

Kendriya Vidyalaya, Bidar — CBSE 2007 – 2017

Skills

Proficient: Golang — PHP — JavaScript

Familiar: React — Next.js — PostgreSQL — Redis — MySQL

Message Queues: Kafka — RabbitMQ

Tools & Platforms: Docker — Git — Linux
